

WOOD & COMPOSITES

Rakoll® 2021

The use of 3D lamination for cabinet doors production has been present in the woodworking market for decades. Our new one-component water-based **Rakoll 2021** for membrane press spray application has proven its versatility, showing the high heat resistance needed by the most demanding customers, but also the easy reactivation properties required to ensure good results under the most difficult circumstances.

Rakoll 2021 offers your cabinet door production the reliability you need.

FEATURES AND BENEFITS:

- High heat resistance. Over 100°C under specific conditions.
- Easy and fast reactivation. Possible to reactivate at relatively low temperatures.
- Smooth application. Very good spreading.
- Immediate high peel strength values after pressing.
- Valid for several decorative substrates: wood-based materials, MDF, acrylonitrile butadiene styrene (ABS) and polyvinyl chloride (PVC).

Rakoll 2021 is available
in 25 and 30 kg pails,
and IBC.

ABOUT H.B. FULLER

Since 1887, H.B. Fuller has been a leading global adhesives provider focusing on perfecting adhesives, sealants and other specialty chemical products to improve products and lives. H.B. Fuller's commitment to innovation brings together people, products and processes that answer and solve some of the world's biggest challenges. Our reliable, responsive service creates lasting, rewarding connections with customers in electronics, disposable hygiene, health and beauty, transportation, aerospace, clean energy, packaging, construction, woodworking, general industries and other consumer businesses. And, our promise to our people connects them with opportunities to innovate and thrive.
