Cyberbond CB

Cosmetic Extension Line

Cyanoacrylate adhesives: ensuring the right performance features for you and your customers

Advantages

- Assessed by European Cosmetic Directive 1223/2009
- Free of Hydroquinone
- Include special polyurethane to achieve better aging performance, especially under challenging environmental conditions
- Humidity and media resistance
- Optimal performance at 40-70% air humidity

All-in-One Solution

With our additional product program, we offer all-round carefree packaging for your cosmetic needs

CB 600 Cyanoacrylate Conditioner

- Solvent-based conditioner for degreasing and preparing natural eyelashes before bonding with cyanoacrylates
- Airing time of three minutes under normal environmental conditions
- Prepares a defined surface by removing pollutions

CB 900 Cyanoacrylate Remover Gel

- Softens, dissolves and removes cyanoacrylate adhesives
- Gel, which allows better application control and longer dwell time
