

IG Production

# KÖDISPACE 4SG

Your benefits at a glance

With H.B. Fuller | KÖMMERLING's KÖDISPACE 4SG you get the top warm edge system. The unique reactive thermoplastic spacer system has very low thermal conductivity and performs at the highest level, compared to other warm edge systems. KÖDISPACE 4SG is the premier solution for both commercial and residential applications, allowing for unmatched flexible design freedom.

## Unmatched economic advantages

- maximum automation
- huge potential savings in production
- smooth production workflow due to highest process reliability
- no failures and claims

## Limitless design possibilities

- no limitation in size, weight, shape and design
- allows production of jumbo sizes
- cold-bent IG units possible
- commercial and residential applications

## Highest sustainability

- longest durability
- outstanding gas tightness
- highest energy efficiency
- 50+ years life time expectation

Invest today in the future of tomorrow!  
Benefit from our expertise and service - our innovation is your competitive advantage.
