

How to Palletize Finished Goods with H.B. Fuller Adhesives

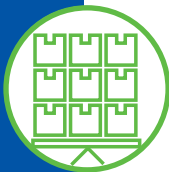

INSTALL EQUIPMENT

Purchase on-demand, auto-fed adhesive dispensing equipment from your preferred manufacturer. Install the unit.

TRAIN YOUR TEAM

Train your team on your new line configuration. Since the adhesive is auto-fed, you don't need a dedicated operator.

STABILIZE PALLETS

Apply H.B. Fuller palletization adhesives to the top of finished goods. Stack the goods on top of one another to stabilize pallets.

DOCUMENT SAVINGS

Record your reduced usage of corrugated slip sheets and environmentally unfriendly stretch film. Quantify any productivity savings from increased line speed due to alleviating the bottleneck often caused by slow stretch wrap stations.

PROMOTE YOUR ENVIRONMENTAL THOUGHT LEADERSHIP

Share your results of H.B. Fuller palletization adhesives with customers, consumers and shareholders. Your successful reduction in stretch film and slip sheets use becomes a proof point of how your company is practicing lean manufacturing and eliminating excess packaging to better the planet.

Contact techsupport@hbfuller.com or your local H.B. Fuller rep for a detailed stretch wrap savings analysis.
